

Duration: 5 Days

Training Sessions: 9 – 13 July 2018 (Bangkok)

Fees: For Carbon Steel : 49,000 Baht / Person*

Fees: For Stainless Steel : 59,000 Baht / Person*

Suitable for:

- Welders, Boilermakers and Pipe Fitters wishing to improve their performances.
- Performances and skills based on which a welder qualification may be considered.

Objectives:

To master the Arc Welding process with coated Electrodes and to prepare the related Welder Qualifications (ISO, ASME, EN).

At the end of the course, you will be able:

- To weld butt joints in all positions
- To weld pipes and tubes in all positions
- To interpret your Welding Procedure Specifications (WPS)
- To prepare your parts to be welded according to the thickness and welding position
- To set up your equipment
- To evaluate your weld pool by adjusting your positioning to ensure a quality weld
- To recognize weld defects and to assess their level of severity depending on the expected welding type
- To implement the necessary corrective actions
- To know and apply rules of hygiene and safety

This course includes practical workshops

Content:

THEORY

- Principles of the method and scope
- Generators
- Welding parameters
- Joint preparation
- Welding processes
- Defects in welds
- Basics of welds inspection
- Health and safety
- Costs of a weld
- Interpretation of a Welding Procedure Specification (WPS)

EVALUATION

- Control of the knowledge acquired
- Corrections and comments

PRACTICAL WORKSHOPS

- Carrying out of various assemblies led of an experienced and qualified instructor
- Type of joint: bevel angle, fillet, cover and buff
- Welding position: flat, vertical up & down, horizontal overhead
- Welding of piping, tubes, shapes and sections (all positions)
- Visual checks of the assemblies (texture and / or radiography)

* Excluding VAT - Published prices and schedules are subject to change without advance notification

* Registration fees are inclusive of lunch and coffee breaks
